

The 22nd IEEE International Conference on Ubiquitous Intelligence and Computing (Hybrid)

<https://swc-ieee-2026.github.io/uic/>

University of Calabria – Rende, Italy – 7-11 September 2026

Call for Papers

General Chairs

Antonella Guzzo, *University of Calabria, Italy*

Francesco Piccialli, *University of Naples*

Federico II, Italy

Jaideep Vidya, *Rutgers University, USA*

Technical Program Chairs

Ying Zhang, *Northwestern Polytechnical*

University, China

Magnus Johnsson, *Kristianstad university,*

Sweden

Fabio Giampaolo, *University of Naples*

Federico II, Italy

Workshop/Special Sessions Chairs

Dipanwita Thakur, *University of Calabria,*

Italy

Fahed Alkhabbas, *Malmö University, Sweden*

Publicity Chairs

Badal Soni, *NIT Silchar, India*

Carmela Comito, *ICAR-CNR, Italy*

Hangli Ge, *The University of Tokyo, Japan*

Web chair:

Vincenzo Barbuto, *University of Calabria,*

Italy

Important Dates

- *Full Paper Submission: Apr 1, 2026*
- *Acceptance Notice: July 1, 2026*
- *Camera Ready: July 31, 2026*
- *Early Bird Registration: August 15, 2026*

Ubiquitous sensors, devices, networks, and information are driving the emergence of a smart world, where computational intelligence is seamlessly embedded into the physical environment to deliver reliable, context-aware services to people. This pervasive intelligence is reshaping the computing landscape, enabling novel classes of applications and systems and greatly expanding the boundaries of what computing can achieve. By infusing everyday objects with intelligence, a wide range of tasks and processes can be simplified, optimized, and made more engaging.

Ubiquitous computing aims to design and realize such intelligent environments, services, and applications. We invite high-quality, original, and unpublished contributions that advance the state of the art in ubiquitous intelligence and computing.

The topics of interest include (but are not limited to) the following:

- Intelligent/Smart networks and pervasive communication
- Smart devices and intelligent objects
- Reliability and resilience of pervasive systems
- Evolution of traditional computing paradigms (e.g. federated learning)
- Human–environment interaction in intelligent spaces
- Knowledge Representation and Reasoning
- Green and Sustainability AI computation
- Edge and fog computing for distributed intelligence
- Scalability of ubiquitous systems
- Security, privacy, and data protection in ubiquitous computing
- Social and ethical implications of pervasive intelligence
- Smart Applications (e.g. in smart cities, healthcare)

Kinds of accepted submissions: original contribution in the form of Full Paper (6 pages), Short Paper (4 pages), and Poster/Demo papers (2 pages)

Publication Details: All accepted and presented papers will be submitted to IEEE Xplore and **indexing** databases like Elsevier, IET, and Scopus.

A **special issue** on an ISI-impacted journal will be organised. A set of high-quality papers will be invited to submit an extended contribution.
